What we already know: We live in Towcester which is a market town in the UK. We live in England which is one of the 4 countries in the United Kingdom. There are physical and human features. Humans build human features to suit the people that live there. Physical features are not made by humans. Human and physical features attract tourists.

Year 1 and 2- The 7 Continents and 5 Oceans

What's next?

Geographical questions: Is there somewhere bigger than the UK? What is the difference between land and sea? What's the difference between a country and a continent? Why are some continents and countries warmer than others?

Locational Knowledge

- Locate the 7 continents.

- Locate the 5 oceans

- The equator separates the north and south hemisphere

- The North Pole and South Pole are the opposite ends of the earth

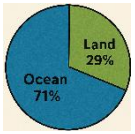
Human Geography

- Different countries have different types of settlements

- Populated countries have more human features.

Physical Geography

- 70% of the earth's surface is covered by sea.



- The earth has a northern and a southern hemisphere

- The North Pole and South Pole are the coldest points because they are furthest away from the sun.

Sustainability

- Continents are separated by borders.

- We can travel between countries and continents with planes and boats.

- Hot and cold countries produce different things.
- Some places are too hot or cold to live.
